LISTING of VARIETIES
CAMELLIAS & AZALEAS
1938-1939

Gerbing's Azalea Gardens

FERNANDINA, FLORIDA

Fall, 1938—Spring, 1939

Post Office and Shipping Point, Fernandina, Fla.
Telephone, 2100, Fernandina, Fla.
Telegraph, Fernandina, Fla.
Gardens and Nursery located at Amelia City, Fla. State Road No. 17 to Yulee, Fla. No. 13 to Fernandina, Fla. Amelia Road to Gardens.

TERMS OF BUSINESS

Cash or satisfactory reference must accompany all orders for immediate shipment. On orders booked for future delivery, 25% deposit with the order and balance due when shipment is made.

Shipping Information

We can ship by Freight, Express, or by Boat. Our shipping point is FERNANDINA, FLORIDA. Boat shipments from Jacksonville, Fla.

Substitution

We will not substitute unless customer requests.

Claims

Our liability ceases upon delivery to carrier of nursery stock, properly packed, and accepted by public carrier.

Should there be any errors in making up the order, claim must be made within 10 days from date of receipt of shipment. We will not be liable for more than the purchase price of the plants.

Quality Stock

We pride ourselves on the healthy vigorous plants that we grow. We are very careful not to send out stock unless we are certain it is true to name.

Grading of Stock

Camellia Japonicas are graded as to heighth. Plants 12" high to 17" would be graded as 12"-18" etc.

Azaleas are graded as to the diameter of the plant across the top. Plants 4" wide and not over six inches, will be 4"-6".

CULTURAL INFORMATION

Helps and Hints for Successfully Growing Camellias and Azaleas

Camellia Japonica can successfully be transplanted from early September through March.

Azaleas can be transplanted the year around without injury. However, the best time is before they come into bloom, that is September through February.

Soils Preferred

Good drainage is necessary. They should not be planted where water stands for long periods. A bed 12"-18" deep of black fresh water pond muck is ideal, to this add well rotted dairy fertilizer, or Azalea Special. Cottonseed meal mixed with the muck is very beneficial. However, do not use cotton seed meal as a top dressing unless thoroughly washed in with the hose immediately. Cotton seed meal will burn if not dissolved with water, injuring the roots on Azaleas.

Insect and Disease Control

Camellias are attacked by several species of Scale insects. If the leaves on Camellias are spotted and streaked yellow, this is usually caused by Scale on the underside of the leaves. They should be sprayed with Nursery Volk, Jr or Citro Mulsion, one part to 50 parts water. Spraying should be done in the spring or early summer. Spray from the underside so that all of the leaves are covered with spray on the underside. A warning, do not spray Camellias in late fall or winter, a sudden cold spell will often kill plants that have just been sprayed.

There is also a fungus disease known as Formopsis. This disease attacks the stem and branches of Camellias. It is apparent by branches shriveling and dying off, usually during the summer months. To control, spray with Bordeaux mixture, 8 pounds Bordeaux to 50 gallons of water; to this add 1¼ pounds Kayso. This will cling to the branches for months, preventing the spread of this disease. Sometimes Azaleas are also attacked. These, too, should be sprayed with Bordeaux.

Red Spider attacks both Camellias and Azaleas. It is apparent by dropping of many leaves on Azaleas, Camellia leaves become rusty brown in color. Control with S. A. T. Dust, Sulphur Dust, Arsenate of Lead and Tobacco Dust, 8 pounds Sulphur, 1 pound Arsenate of Lead, 1 pound Tobacco Dust. Dust on early in the morning before the dew dries on the foliage. Dust from the underside of the leaves.

General Cultural Hints

Camellias and Azaleas thrive under the same conditions and culture. Keep them uniformly moist at all times. Do not drown them nor let them dry out completely. Success or failure will depend on the soil that you plant them in at time of planting. Be liberal with good soil and fertilizer. Keep Scale and Red Spider under control at all times. Prune to keep the plants shapely. This should be done in spring and summer, not later than August 1st.

They will thrive either in shade or full sun. However, those planted in full sun must be kept mulched and properly watered. Kurume Azaleas will bloom much more profusely in dense shade than the Indica Azaleas. Azalea and Camellias will bloom more profusely if planted in full sun. However, the flowers will fade and will not last as long as those planted in partial shade. Then, too, those in full sun will sometimes be injured by frost, while those in partial shade will have protection from the cold. Sometimes Camellias refuse to bloom. If you have such a plant, root prune or transplant. The shock of either will produce bloom the following season. This should be done in March or April.

In conclusion we urge you to plant Camellias and Azaleas. They are easy to grow, their profusion of bloom in the winter and spring is a constant joy to those who have these most popular southern shrubs.

●

SOME INFORMATION REGARDING THE AZALEA FLOWER SPOT.

This Azalea Flower blight was first noticed in one of the south's famous gardens about 1931 and has spread through the south. The federal government has had men doing experimental work in the endeavor to perfect a cure. As this catalogue goes to press we can give you the following information as to control. Begin dusting your Azaleas just as the buds show color with 25 per cent Copper Hydro Dust, this is available from the William M. Bird & Co., Inc., Charleston, South Carolina. If the buds and flowers are kept coated with this dust this flower blight can be greatly reduced. After a heavy fog or rain dust should be applied as soon as buds and flowers are dry.

Fortunately this blight does not in any way injure the plant or foliage, in spite of injury to Azaleas by this flower spot they are yet the most colorful of all southern shrubs.

Further information can be obtained from Mr. Freeman Weiss, Senior Pathologist, Bureau of Plant Industry, Washington, D. C.

Rare Gold Medal Camellias

These varieties are the finest rarest most gorgeous of all available Camellias. We have spent seven years buying and trying out hundreds of varieties and of those hundreds we have selected the following varieties as being the most desirable, unusual and exqusite of them all. Being very rare and limited we cannot supply stock in large sizes in most of these, we do however have small plants of most sorts.

Imura, White—The most beautiful white semi-double we know. A hybrid from Alabama, Semi-double snow white waterlily type, long narrow petals of porcelain texture, flower is 5½" to 6" in diameter, with yellow stamens in center, long dark green narrow foliage, open upright growth, Midseason bloomer, available in 10-12" 8-10" 6-8" and from 2½" Pots.

Sawada, Salmon Pink—A hybrid from Alabama Semidouble salmon pink streaked and speckled white some flowers solid pink, 5"-5½" in diameter, round dark green foliage, tall open growth, midseason bloomer, exquisite. Available in 12-15" 10-12" 8"-10" and from 2½" pots.

Victor Emanuel 2nd, (Blood of China)—It is impossible to describe this variety to do justice to its beauty. Large peony form of the most dazzling red, form of the flowers is exquisite. Dark green foliage medium fast grower, midseason bloomer, available in 12-15" 10-12" 8-10" and from 2½" Pots.

Marquis De Exeter,—A full peony form, 4" in diameter, flesh pink striped and speckled with deep pink, some are solid pink. This variety holds its blooms an extremely long time. Light green foliage, wide spreading growth, midseason bloomer. Available in 15-18" 12-15" 10-12" and from 2½" Pots.

Derbyana—A double red of rosebud form when first opening, when full open showing golden stamens among inner petals, flower 4-4½" in diameter, dark green, glossy foliage, bushy good grower, free flowering in midseason. Available in 15-18" 12-15" 10-12" and from 2½" Pots.

Rev. John G. Draytton—A loose peony form of pleasing deep pink color, petals are wavy intermixed with golden stamens, tall angular growth, light green foliage, early bloomer. Available in 12"-15" 10-12" 8-10" and from 2½" Pots.

Princess Bachinachi—Full double dark red flowers of good size marbled with white. The flowers last for many days in perfect condition on the bush. Tall, fast growth. Large round glossy foliage. Available in 18"-24" 15"-18" and from 2½" Pots.

Emperor of Russia—Very large brilliant red flowers of peony form, golden stamens among inner twisted petals, flower appears to be four or five in one. A dazzling red that takes first place in any garden where it is in bloom. Dark green foliage. Slow, bushy growth. Our finest red peony form. Available in 24"-30" 18"-24" and from 2½" Pots.

Mathotiana, Rubra—An immense double deep red flower, when fully open some show short stamens in center of bloom, large dull green foliage. Fast, tall growth. Mid-season. Available in all sizes up to 30"-36".

RARE GOLD MEDAL CAMELLIAS (Continued.)

Sweeti Vera—Large loose peony form flower. Flesh pink streaked rose, dull green foliage, slow growth, midseason bloomer. Available in 15"-18" 12"-15" and from 2½" Pots.

Gigantea—Immense semidouble deep red striped and marbled with white. Late flowering. Immense dark green leaves, tall open growth. Available in 10"-12" 8"-10" and from 2½" Pots.

Catherine Cathcart—Late flowering full double pink marbled with white. Round light green foliage, slow growth. Available in 12"-15" 10"-12" and from 2½" Pots.

Empress—An immense semi-double deep pink flower with golden stamens in center, glossy deep green foliage. Tall, slow growth. Early flowering. Rare and very desirable. Available in 18-24" 15-18" 12"-15" and from 2½" Pots.

H. Downing—Very large loose peony form flowers of deep rosy red, stamens among petals. Low, bushy, slow growth. Dark green foliage. Available in 2½" Pots only.

Our No. 156—An immense loose peony form flower of deep rosy red. Flower is so large it appears to be several in one. Fast, tall growth. Large dull green foliage. Midseason bloomer. Available in 18"-24" 15-18" 12-15" 10-12" and from 2½" Pots.

Our No. 7—A fluffy peony form medium size bloom, soft pink, dull green foliage. Late flowering. Slow, bushy growth. Available in 12-15" 10-12" 8-10" and from 2½" Pots.

Marchioness of Salisbury—Peony form flowers of darkest red marbled white, flower 3" in Diameter, narrow light green foliage, very slow grower, tall angular, late flowering, extremely rare. Only a few 12-15" and from 2½" Pots available.

Mathotiana Rosea.—A full double very large flower 5-6" in diameter, solid medium pink, is of same form as Mathotiana Rubra. Large long dark green foliage, tall angular grower, midseason bloomer. Available in 4-6" and from 2½" Pots only.

Nagasaki—Semidouble rose pink streaked white. Late flowering. Round dark green foliage, very slow grower. Available in from 2½" Pots only.

Gov. Mouton—Late flowering, Peony form deep red marbled white medium growth, dark leaves. Available in 15-18" 12-15" 10-12" and from 2½" Pots.

Collettie Moculata—A peony form flower, blood red striped and marbled with snow white. Large outer guard petals, round deep green leaves. Very slow growth. Low and flat. We believe this to be the finest peony form variegated Camellias. Available in 18-24" 6-8" and from 2½" Pots.

Fanny Basil—Very large semidouble dark red variegated with white. Golden stamens in center of flower, large dark green leaves, medium growth, midseason bloomer. Available in 24-30" 18-24" 15-18" 12-15" 10-12" 8-10" 6-8" and from 2½" Pots

Countess Lovinia Maggi — Very large double pink striped white, late bloomer, long narrow light green leaves, extremely slow growth. Available in 15-18" 12-15" 10-12" and from 2½" Pots.

Brassennie—Full double white, marbled rose red, large round leaves, very slow growth, rare and unusual. Available in 2½" Pots only.

RARE GOLD MEDAL CAMELLIAS (Continued.)

Debutante.—A beautiful light pink peony form flower 3½" to 4" in diameter, early flowering, slow growth, light green foliage, very rare, limited stock in 2½" Pots only.

Bessie McArthur, (one of our hybrids)—Large semidouble clear deep pink, three to four layers of very large petals, prominent stamens with small petaloids intermixed, 5" in diameter. Low bushy grower, large glossy long foliage. Immune to cold injury. Available in 2½" Pots only.

Lawrence Haines, (One of our Hybrids.)—Full peony form darkest velvet red large twisted petals intermixed with a few golden stamens, flowers are 3" to 4" in diameter. The plant grows tall angular, the foliage long narrow light green, a splendid Camellia. Available in 2½" Pots only.

Edith Churchwell. (One of our Hybrids.)—A loose poeny form with wavy petals snow white, flower is 3½ to 4" in diameter, the plant is a slow bushy grower, foliage is medium large and dark green, opens in January. This is the most exquisite white peony form Camellia we have seen. Available in 2½" Pots only.

Mrs. Miller Wilson. (One of our Hybrids.)—A semidouble star shaped snow white flower 3" in diameter, two layers of outer petals then a layer of stamens then a second layer of petals and again stamens, center of flower has stamens and petaloid mixed, very fast tall open grower, light green medium large foliage. This is a most unusual and novel variety. Available in 2½" Pots only.

Pink Poppy. (One of our own Hybrids.)—A single soft pink flower 3" in diameter, some are semidouble, the entire flower is covered in the inside with a rosette of golden stamens, resembles a poppy, very novel and most handsome, is fragrant, slow grower tall angular, foliage is round and dark green. Available in 2½" Pots only.

Nellie Cohen, (One of our Hybrids.)—A semidouble to loose peony form flower of a most pleasing shade of pink not found in other Camellias, flower is 3½" to 4" in diameter, has some golden stamens among twisted petals, the plant is a bushy grower, foliage is round and medium green, a Fine Camellia Available in 2½" Pots only.

C. M. Hovey, (Magnolia King.)—A full double dark red marbled and speckled with snow white. Flower is 4" to 5" in diameter, very large petals, slow bushy grower, large long dull green foliage. Available in 6-8" and from 2½" Pots.

To Our Garden Club Friends

Our show Gardens are open for visitors from September 1st to April 1st. There is no admission charge, we have ample parking space, good paved roads. We have more than 200 varieties of Camellia Japonicas and over 100 varieties of Azaleas. Camellia Sasanquas are in full bloom in October and November. Camellia Japonicas are in full bloom in January, Azaleas in late February thru March.

We are again this season serving our Famous Oyster Dinners, the site is located 1-4 mile from the Gardens on the banks of the Amelia River, we will specialize in our famous Oyster Dinners as they were served in the years 1918 to 1931. We can offer special rates for Garden Club luncheons. Telephone, Manager, Gerbing Oyster Farm, Fernandina, Florida.

There is ample space in our dining room for club meetings.

Our Nursery is one of the most modern in the south, we have a large stock of Camellia Japonica, Camellia Sasanqua, and Azaleas, approximately 100,000 plants of the very finest quality at reasonable prices. We specialize in rare fine Camellias.

Many of our varieties are described in this catalogue. However, we have many more varieties not listed, descriptions are inadequate and do not do justice to the beauty and elegance of Camellias. Come and see them in Bloom.
